Could Marburg Virus Be a Potential Bioweapon and Part of a Larger Agenda?

Sixbert SANGWA • October 03, 2024

In recent years, there has been a growing discourse about the Marburg virus and its potential use in bioweapons as part of larger global agendas. Some suggest that this virus is being weaponized in the context of the New World Order, potentially leading toward the rise of the Antichrist. These claims are often tied to concerns about government control, media manipulation, and advanced technologies, particularly the controversial use of 5G. To unpack these complex discussions, we must carefully examine the various aspects and understand them in light of biblical truths.

The Planned Use of Bioweapons

A bioweapon is the deliberate use of biological agents—such as viruses, bacteria, or toxins—to harm or kill humans, animals, or plants. These weapons are designed to cause widespread destruction, illness, or death, often without immediate detection. Several modern viruses have been suspected of weaponization, including HIV (the virus responsible for AIDS) and Ebola. More recently, researchers like Latypova (2023) and Callender (2023) have suggested that the coronavirus pandemic may have had elements of bioweaponry, aimed at social and political control. Other notable examples historically considered or used as bioweapons include anthrax, which has been used in terror attacks, and smallpox, which has been considered for warfare in the past.

It is believed that these bioweapons are used alongside psychological warfare to instill fear in populations, justifying increased government control, lockdowns, and medical mandates. Whistleblowers and theorists propose that global elites manufacture or plan these crises to implement New World Order agendas. For example, videos like *"Next Plandemic Already Underway"* examine how viruses such as Marburg might be employed in the next phase of this alleged plan.

It's clear that we live in a time of increasing fear and deception. However, the Bible reassures us that God is sovereign, and no plan of the enemy can thwart His ultimate purpose for the world. The forces behind these bioweapons may seem overwhelming, but believers have the promise of God's protection: *"Because you have kept my command to endure, I will also keep you from the hour of testing that is going to come on the whole world to test those who live on the earth"* (Revelation 3:10).

What Is the Marburg Virus?

The Marburg virus, first identified in 1967, causes severe hemorrhagic fever, similar to the Ebola virus. Historically, outbreaks have been limited, mostly affecting regions in Africa. However, recent reports and whistleblower testimonies suggest that this virus could be weaponized in new, frightening ways. The virus's lethality and infectious nature make it a candidate for bioweapons programs, heightening global concerns about its potential misuse.

Sasha Latypova and Dr. Jane Ruby, in their discussions, have expressed concerns about the PREP Act, which provides immunity to pharmaceutical companies during public health emergencies (Latypova & Ruby, 2023). These concerns raise questions about transparency, accountability, and whether the general public is being misled regarding the true nature of health crises like the Marburg virus.

The Role of the New World Order and the Antichrist

Some of these discussions tie into the broader agenda of a New World Order (NWO) — a term used to describe an authoritarian, global government that seeks to control every aspect of human life, from healthcare to individual freedoms. This idea has strong eschatological undertones, often linked to the rise of the Antichrist, as foretold in the Bible. According to Revelation 13:16-17, the Antichrist will enforce a system where no one can buy or sell unless they have the mark, suggesting a future where global control is exerted over humanity.

Skeptics might dismiss these claims as mere conspiracy theories, but they align with many Christian interpretations of end-times prophecies. Jesus warned about deception in the last days, stating, *"For false messiahs and false prophets will appear and perform great signs and wonders to deceive, if possible, even the elect"* (Matthew 24:24). As Christians, we must remain vigilant, discerning truth from falsehood in these complex narratives.

5G, Bioweapons, and the Marburg Virus

A significant aspect of the conversation revolves around the idea that 5G technology could be used to activate bioweapons, particularly the Marburg virus, within the human body. According to experts like Todd Callender, there is a theory that 5G could *"activate"* certain biological payloads, including the Marburg virus, allegedly embedded in modern vaccines or other medical treatments (Callender, 2023; Prather, 2023).

This theory suggests that advanced frequencies could trigger viral outbreaks, potentially causing widespread devastation. While such claims shouldn't be dismissed outright, they require careful scrutiny. Christians must approach these ideas with discernment, avoiding sensationalism. Our faith encourages us to seek wisdom, as the Scripture reminds us: *"The fear of the Lord is the beginning of wisdom, and the knowledge of the Holy One is understanding"*(Proverbs 9:10).

The Connection Between Vaccines and Bioweapons

Several reports claim that the Marburg virus may be present in certain COVID-19 vaccines, potentially setting the stage for future outbreaks. Recent presentations by medical and public health experts like Rashid Buttar (2023) and Jeffrey Prather, Dr. Lt. Col. Peter Chambers, and Attorney Todd Callender (2023) have made very shocking revelations. They suggest that components of the Marburg virus have been incorporated into hydrogel in vaccines, potentially leading to a future scenario they describe as a *"zombie apocalypse."* In their discussions, Jeffrey (2023) aligns with Alex Luna (2023) who suggested that Marburg virus was planned to obscure the consequences of the COVID-19 vaccines. Similarly, Dr. Ariyana Love (2023), a naturopathic practitioner, expands this idea by exposing the presence of substances like graphene oxide and components of Ebola and Marburg viruses in specific vaccine batches. Are We Heading Toward a Planned Pandemic?

Well, a recurring theme in Kieran Morrissey's (2023) and Dr. Ariyana Love's (2023) discussions is the concept of a *"plandemic"*—a notion that global elites are orchestrating viral outbreaks to advance their agenda. Their discussions often explore how the Marburg virus could be the next manufactured health crisis, designed to incite fear and justify authoritarian measures.

While the notion of a zombie apocalypse and bioweapons may sound far-fetched, it reflects a genuine concern about the potential dangers of untested vaccines and their long-term effects. As Christians, we are called to be *"wise as serpents"* (Matthew 10:16), asking critical questions about the technologies and medical practices being imposed on us.

Fear-Mongering and the Media

Another crucial point raised in these discussions is the role of the media in promoting fear and shaping public perception. Physicians and health professionals, like Dr. Lee Vliet (2023), argue that the media is deliberately amplifying fears surrounding the Marburg virus to justify draconian measures like lockdowns, forced vaccinations, and increased surveillance. This manipulation aligns with the alleged 21 goals of the Illuminati, particularly their aim to control and manipulate mass media to influence public opinion. In this sense, the media has become a tool for global elites to push their agendas, using health crises as a pretext for controlling the masses.

This manipulation aligns with biblical warnings about deceit in the last days. *"They exchanged the truth of God for a lie"* (Romans 1:25) aptly describes the kind of spiritual and moral deception that can occur when society abandons godly wisdom for worldly fears. As Christians, we are called to remain grounded in the truth, *"not conforming to the pattern of this world"* (Romans 12:2).

Conclusion:

As we navigate these complex and sometimes overwhelming discussions, it is essential to remain rooted in Scripture and to trust in God's sovereignty. While it is wise to stay informed and discerning, we must avoid falling into fear or hysteria. Instead, we should respond with faith, wisdom, and compassion, being salt and light in a world filled with confusion.
From a Christian perspective, we know that our ultimate hope is not in avoiding earthly trials but in remaining faithful to Christ, even when facing difficult times. Jesus warned of future tribulations, saying, *"In this world, you will have trouble. But take heart! I have overcome the world"* (John 16:33). Let us also remember the words of the Apostle Paul: *"Do not be anxious about anything, but in every situation, by prayer and petition, with thanksgiving, present your requests to God"* (Philippians 4:6). Whether the Marburg virus becomes a significant threat or remains a point of speculation, our confidence remains in Christ, who holds all things in His hands.
